Subject: ALS Subcontract work
Attachments: [Nonresponsive based on revised scope].vcf; ALS Subcontract Cost Explanation.pdf

The subcontract work that ALS did and Joanna flagged was for Bulk Density Testing (ALS Work Order # 3072188) on the IPS, IPC and IPN soil piles. This analysis was required so we could check the bench test results of the proposed subcontractors who are bidding on treating the IP soil piles, Just as we did for the TCLP Pb and Cd testing to check results. The samples were split between vendors and ERRS lab.

Please leave the cost on the 1900 and use this email and attachments as back up for Joanna.

Any questions please let me know.

No job is so important and no service so urgent, that we cannot take time to perform our work safely.
